Result	Inference
Positive	Occult blood present
Negative	No occult blood

Comments

This test is mainly used as screening for asymptomatic ulcerated lesions of the GI tract. In order to avoid false positivity, certain dietary and drug restrictions are recommended. For 3 days before the test avoid large doses of drugs like Aspirin / NSAID / Vitamin C / Oral iron, red meat, poultry, fish, vegetables like cucumber, horseradish & cauliflower & vigorous brushing of teeth with a hard toothbrush.

IMPORTANT INSTRUCTIONS

- Test results pertain to specimen submitted
- All test results are dependent on the quality of sample received
- Investigations are only a tool to facilitate in arriving at a diagnosis and should be clinically correlated by the referring physician
- Report delivery may be delayed due to unforeseen conditions
- Certain tests may require further testing at additional costs for derivation of exact value
- Test results may show inter/Intra laboratory variations
- The courts of Delhi shall have exclusive jurisdiction in all disputes/claims concerning test(s) and/or result of test(s)
- Test results are not valid for medico legal purposes.
