

Name : TESTNOW

Patient ID : SC23F000002

Gender : Male

Place : Bangalore

Age : 62

A/c Status :

Lab No. : SC1

Ref By : me

Date & Time : 11/07/2024 14:05:02

Test Category	Test Name	Results	Units	Bio. Ref. Interval
Diabetic Marker	U-Albumin	200*	mg/L	<20

### Summary

Albumin is a protein that is present in large amounts in the blood. When kidneys are functioning properly, only a tiny amount of albumin leaks through into the urine, less than 30 mg/day. In kidney failure (the last stage of a slow process of decline in kidney function), large amounts of protein are spilled into the urine

Category	Reference Range in mg/L
Normal/ Non – Diabetic	<20
Micro-albuminuria	20 – 200
Macro-albuminuria	>200

### Interpretations

Moderately increased levels in urine indicate that a person is in one of the very early phases of developing kidney disease. Recently, studies have shown that an abnormal result indicates an increased risk of developing heart and blood vessel (cardiovascular) complications, especially in people with diabetes. Low levels are an indication that kidney function is normal. Moderate to high, persistently elevated levels of albumin in urine over three to six months is a requirement for establishing a diagnosis.

**Note:** It is recommended that at least two of three specimens collected within a 3-6 month period be abnormal before considering a patient to be within a diagnostic category.

### Clinical Use

- Early detection of Diabetic nephropathy
- Therapeutic monitoring of patients with Nephropathy
- Routine management of patients with diabetes

**IMPORTANT INSTRUCTIONS**

- Test results pertain to specimen submitted
- All test results are dependent on the quality of sample received
- Investigations are only a tool to facilitate in arriving at a diagnosis and should be clinically correlated by the referring physician
- Report delivery may be delayed due to unforeseen conditions
- Certain tests may require further testing at additional costs for derivation of exact value
- Test results may show inter/Intra laboratory variations
- The courts of Delhi shall have exclusive jurisdiction in all disputes/claims concerning test(s) and/or result of test(s)
- Test results are not valid for medico legal purposes.
